# Plastics Recycling Technology

2019

After the successful launch edition in 2017, AMI again runs its Plastics Recycling Technology conference on 18 - 19 June 2019 at the Hilton in Düsseldorf, Germany. This conference brings together key players and industry experts from across the supply chain to explore how technology is enabling the increase of plastic recycling rates and adding value to recycled materials.

Over two days, speakers will share both technical and commercial insight into exciting new raw materials, additives, recycling technology and innovative projects for the plastics recycling sector. As well as a comprehensive analysis of the market including challenges, new requirements, regulations and future trends. And new this year will be a focus on chemical recycling developments.

Discussions will cover all aspects of plastics recycling from advancements in the recyclability of packaging, sorting and recycling lines, to innovations in additives, chemical recycling and ways to close the loop for difficult to recycle plastics. This is a crucial conference to attend to stay ahead of the curve with future technology developments, touch base with your industry contacts and develop new relationships, as well as to hear from key players from across the world all in one place.

*Good Networking and great overview of the wide range of topics within recycling*
